## SIGNUP PAGE :

The image shows a web browser window with a dark theme. The address bar displays the file path: C:/Users/ishun/OneDrive/Desktop/application/Login.html. The page background is a gradient of purple and pink. In the center, there is a white card titled "Signup Form". Inside the card, there are two buttons at the top: "Login" (white with black text) and "Signup" (pink with white text). Below these are three input fields: "Email Address", "Password", and "Confirm password". At the bottom of the card is a large pink button with the text "Signup".

# DATA BASE CONNECTION :

The screenshot shows a Jupyter Notebook interface. At the top, the header includes the Jupyter logo, the text "jupyter ASS", and a status message "Last Checkpoint: a few seconds ago (unsaved changes)". On the right, there is a "Logout" button. Below the header is a menu bar with options: File, Edit, View, Insert, Cell, Kernel, Widgets, and Help. To the right of the menu bar are buttons for "Trusted" and "Python 3". Below the menu bar is a toolbar with icons for file operations (save, open, copy, paste), navigation (up, down), execution (run, interrupt, stop), and a dropdown menu currently set to "Code".

The main area of the notebook displays a code cell with the following Python code:

```
In [1]: import ibm_db

hostname = '9938aec0-8105-433e-8bf9-0fbb7e483086.c1ogj3sd0tgtu0lqde00.databases.appdomain.cloud'
uid = 'qfk33398'
pwd = 'jnffMaLIMeTZcout'
driver = "{IBM DB2 ODBC DRIVER}"
db = 'bludb'
port = '32459'
protocol = 'TCPIP'
cert = 'CRT1.crt'

dsn = (
    "DATABASE = {0};"
    "HOSTNAME = {1};"
    "PORT = {2};"
    "UID = {3};"
    "SECURITY = SSL;"
    "SSLServerCertificate = {4};"
    "PWD = {5};"
).format(db, hostname, port, uid, cert, pwd)
print(dsn)
try:
    db2 = ibm_db.connect(dsn, "", "")
    print("connect to database")
except:
    print("unable to connect ", ibm_db.conn_errormsg())
```

Below the code cell, the output of the code is displayed:

```
DATABASE = bludb;HOSTNAME = 9938aec0-8105-433e-8bf9-0fbb7e483086.c1ogj3sd0tgtu0lqde00.databases.appdomain.cloud;PORT = 32459;UID = qfk33398;SECURITY = SSL;SSLServerCertificate = CRT1.crt;PWD = jnffMaLIMeTZcout;
connect to database
```
